Dear Patrick,

Cables manufactured by Tycab Australia have been RoHS compliant since 30/06/2006, and are compliant with current RoHS3 requirements. Tycab manufactured cables contain less than the restricted maximum levels of:

|                                |                 |
|--------------------------------|-----------------|
| Lead                           | less than 0.1%  |
| Cadmium                        | less than 0.01% |
| Mercury                        | less than 0.1%  |
| Hexavalent Chromium            | less than 0.1%  |
| Polybrominated Biphenyls       | less than 0.1%  |
| Polybrominated diphenyl Ethers | less than 0.1%  |

And contain nil of Recent RoHS3 restricted substances:

|                                    |        |
|------------------------------------|--------|
| Bis(2-ethylhexyl) phthalate (DEHP) | (0.1%) |
| Butyl benzyl phthalate (BBP)       | (0.1%) |
| Dibutyl phthalate (DBP)            | (0.1%) |
| Diisobutyl phthalate (DIBP)        | (0.1%) |

There are also no REACH 197 substances of concern contained in cables manufactured by Tycab.

Best regards

Bob Stutsel

Technical Manager
